KAROL BHANDARI

8 Collingwood Drive, Collingwood Park
0426367966

Summary:

Highly motivated and experienced QUT Student who has worked as Data Engineer/Analyst for over 5 years, experience and a strong background in Data Science & Engineering. Proficient in using Python, SQL, and other programming languages for data analysis and modeling. Skilled in developing predictive models, clustering algorithms, deep learning techniques, and automation frameworks to extract valuable insights from large and complex data sets. Demonstrated ability to design, develop, and implement automated testing and data processing solutions independently or as part of a team to deliver high-quality results within tight deadlines.

Soft Skills:

- Customer Service Excellence
- Sales & Relationship Building
- Effective Communication
- Collaborative Teamwork
- Respectful & Inclusive Approach

Technical Skills:

- **Programming Languages:** Python, R, SQL
- **Automation Tools and Frameworks:** Selenium, Airflow, PyAutoGUI, TensorFlow, Keras, OpenCV
- **Tools and Frameworks:** Google Data Studio, Google Big Query, GCP Cloud, Google Ads, Google Merchant
- Store, SEO, SEM, Jupyter Notebook, Pandas, NumPy, MATLAB, Scikit-Learn, Tableau, Microsoft Office
- Tools, Prompting (Chat GPT)
- **Databases:** MySQL, SQLite, Redshift, Snowflake, PostgreSQL, BigQuery
- **BI Tools:** Google Data Studio, Power BI, Seaborn, Plotly
- **CI/CD Tools:** Bitbucket, Git, Docker
- **Cloud Technologies:** AWS (S3, Lambda, Athena, Glue, EC2), GCP, Azure **Agile Methodologies:** Jira,Kanban

Experience:

Data Engineer/ Analyst

HealthTrixss (Remote-Contract) – (June 2024 – July 2025)

- Designed and implemented AI-based ETL solutions using LLM and Generative AI for building automation agents and deployed using Airflow
- Developed and maintained automation frameworks for process automation
- Revamped previous ETL stack on SQL Procedure to API Stream using Kafka, Polars & Azure API Management
- Deployed Azure VMs, API, AI Studio, Azure LLM Models, Blob Storage as per the requirement on internal team.
- Automated manual tasks, enhancing QA efficiency and data processing.
- Technologies used: Gen AI, LLM, Autogen, Langraph, Langchain, Selenium

AI/Data Engineer

NapthaAI (Remote)
August2024–Feb 2025)

- **LLMs & AI Agents:** Developed and fine-tuned LLMs, built intelligent agents, and orchestrated multi-agent systems for market analysis and automation.
- **AIOps & Orchestration:** Designed workflows for AI lifecycle management, automated pipelines, and scalable agent-based solutions.
- **Data Management:** Built a PostgreSQL database to store and manage data for parallelly orchestrated systems and integrated TEI embeddings for memory and context retrieval.
- **Tech Stack:** Python, PyTorch, LangChain, Docker, Kubernetes, AWS, Airflow, Prometheus.

Key Achievements:

- Improved LLM efficiency by 30% with distributed computing.
- Enhanced market forecasting by 15% with intelligent agent deployment.
- Streamlined data access with a robust, scalable PostgreSQL solution.
- Group Chat and Internet Research Agents

GrowByData

The US-based company which provides Marketing Intelligence & Analysis to

businesses/merchant across the USA.

Principal Data Analyst

(Jan 2022 – September 2024)

- Interpret complex data sets (structured and unstructured) to identify trends and patterns that could be valuable for diagnostics and predictive analytics efforts. • Manage internal team and clients as a point of contact for requirements and expectations. • Collaborate with the engineering and business team to understand data and reporting needs, discuss the technical feasibility of the reporting needs, and formulate data delivery plans and timelines.
- Develop and implement data collection systems and automation strategies to optimize efficiency and data quality.
- Develop queries and reports using SQL and data visualization tools and perform quality checks of reports to ensure quality delivery.
- Provide database support, write SQL queries, and create ad-hoc reports in collaboration with other systems engineers and software developers.
- Use in-house and third-party tools to gain additional insight into a client's e-commerce business and define areas of opportunity and conduct market research and collaborate with team members to stay up to date on SEO and SEM trends, Amazon trends, and industry changes.
- Collect data from various sources like files, API, Databases, or web/desktop apps and perform automated ETL & reporting for the Customer Engagement Model/Report.
- Automated Customer Success Framework to oversee the client journey and engagement to the business MOM, WOW & YOY.
- Automated manual maneuver tasks from Data Prep, Data Wrangling, Data Cleansing & Operational tasks.
- Amazon & Shopify Catalog Management
- Dashboard Building & Ad-Hoc Reporting

- Developed and maintained SQL queries and automation scripts for data processing.

- Automated manual QA tasks related to data prep, wrangling, and cleansing, improving operational efficiency.

The technology used: Python, Looker Studio, SQL, Postgres, Redshift, Big Query, Google Analytics 4, Automation, Selenium, Restful APIs, Excel, Power BI, Jira, Bit Bucket, Git, AWS (S3, Lambda, Athena, Glue, EC2), Airflow

Built Dashboards & Reports for Multi-National clients like:

- Canon, Calvin Klien, AutoZone, Movado, Motorsport, Chico's, LEGO, Express, Crocs, Rugs USA Whirlpool, American Express, Etsy, Citizens Bank, Microsoft

UNOPS

ICA Associate -Data Analyst

6 Months - Contract

(June 2023 – December 2023)

- Dashboard Creation: Designed interactive, insightful dashboards for KPI tracking.
- Data Exploration: Delved into data, revealing trends and insights.
- Cleansing & Transformation: Ensured reliable data by fixing issues and transforming raw data.
- Custom Reports: Tailored reports met diverse stakeholder needs.
- KPI Alignment: Defined and integrated KPIs for real-time monitoring.
- Data Modeling: Transformed raw data into meaningful metrics.
- Collaboration: Trained teams, fostering a data-driven culture.
- Continuous Enhancement: Improved processes, refining outputs.

The technology used: Python, Google Data Studio, DBT

Pathao Nepal

Data Analyst & Engineering

(Jan 2021 – Dec 2022)

- E-commerce Content-Based Recommendation system using TensorFlow Universal Sentence Encoder & TFIDF.
- Implemented Search Engine on Meili Search
- Write web scraping code for almost all top e-commerce of Nepal to scrape data from the competitors for competitive analysis.
- SQL Queries (Joining, Merge, Window Function, Sub Queries & others, DML, Triggers)
- Competitive Pricing

- Dashboards & Reports (Tableau & EDA on Python)
- ETL pipelines & Data Ingestion, Transformation (Airflow, Cron Jobs, Pentaho) • Data Cleaning for Database as well as for data analysis. (Pandas, NumPy, Pyspark, Seaborn, NLTK) • Digital Analysis through Google Analytics (Reporting & Web Analytics Report Generation) • Webmaster (Create, Update & Design web pages)
- Product Clustering & Categorization for verticals.
- Automation (Selenium & PyAutoGUI) for automating monotonous & repetitive works. • Web Crawler: crawler which goes to every competitor's site as per the vertical and fetches product details on every site.

The technology used: Python, Pandas, NumPy, Pyspark, Seaborn, NLTK, R, HTML, Javascript, Backend Stack

Other Experiences

- 2 years' experience working with International Education Consultancies to automate their content creation: Freelance.
- Social Media Advertising & Handles
- Database creation, Data Cleansing, Reporting, auditing related work done in Medical Distributor Company (1 Year)

Education:

Master of Artificial Intelligence (2025 July – Present) - Queensland University of Technology

Bachelor in information technology (2015 to 2019) - Purbanchal University

High school (2014- 2016) - Deepshikha Higher Secondar School

Certifications:

- Associate Azure Data Engineering - CloudGuru
- Data Engineer with Python: Data Camp
- Data Analyst with SQL - Data Camp
- Certified Data Analyst- Data Camp
- Python Programmer
- Natural Language Processing with Python

- Big Data with Pyspark: Data Camp
- SQL Database Analyst: Data Camp
- Data Visualization with Tableau •Data Cleaning/Machine learning - Kaggle

Personal Projects:

- Movie Recommendation System & Sentiment Analysis
- ETL Pipeline using Azure Synapse, Azure Data Factory
- ETL Pipeline using S3, Glue & Athena
- Road Traffic Accident Analysis/ Prediction in Nepal
- Taxi Fare Prediction in Kathmandu
- Weather Prediction & Forecasting
- ETL Data Pipeline from cooking to productions
- Auto-IG (automated content production to posting by AI and deployed that produces daily content for the IG page)
- Object Detection (Traffic signal & Number plate data collection)
- Database, Schema design & Data Modeling (SQL, Postgres, Redshift) (Kimball & Snowflake)
- Heart Disease Classification & Prediction
- Uber Data Analysis: Pipeline from collection to data modeling & analysis.
- Spotify Data Analysis: Trend analysis & Billboard artists data analysis.
- Instagram Post Automation
